Need to find the right colour?

Â

Choose a foundation sample to ensure that you have the correct colour to suit your skin colour. Testing your foundation colour sample can be quite easy. Apply to your face lightly. When you can not see where you have placed that sample colour it usually means that you have chosen the correct match for your skin tone. Unsure? I suggest you try another area on your face. If the sample colour is disguised after its placement, youâ€™ve found your true match in foundation colour.
